

Projects in Europe... Projects for Europe!

We want to contribute to build a strong, united and interdependent Europe through our professional activities. This contribution could be seen as humble but it makes us veritable actors of the European project.

Because we believe in Europe!

Firstly because it is, as Robert Schuman hoped it would be, a guarantee of peace.

But also because today it is maybe the best answer to the risks related to globalisation.

It ables us to get ready to face tomorrow's challenges i.e.: economically, socially, technologically and environmentally speaking.

Without this Union we would be too weak to brave the current biggest powers (the USA, Japan, China, India and one day Africa).

Because we have to preserve and spread the idea of democracy, Human Rights and the pillars of European social progress.

Because we have to join forces to stay on the right path in both research and innovation.

Because Earth is in danger and that the upcoming challenges concerning the environment, climate change, wildlife and resources conservations are colossal.

Robert LICCIARDI

NéoConseil Europe Director
